Nuance and Cisco Sign Multi-Year Agreement

Cisco to Integrate Nuance Speech Recognition into AVVID Product Line

MENLO PARK, Calif., March 19, 2001 - Nuance (NASDAQ: NUAN), the leader in Voice Web software, and Cisco Systems (NASDAQ: CSCO) today announced that they have entered into a multi-year agreement enabling Cisco to incorporate Nuance's market-leading speech recognition and voice authentication software into its Architecture for Voice, Video and Integrated Data (AVVID) products.

Under the agreement, Cisco will integrate Nuance's speech software into its products to harness the power of human speech as part of its Internet Protocol-based enterprise communication solutions, including Cisco's Call Manager and associated applications. The AVVID products are scheduled to launch in the second quarter 2001.

"Cisco's integration of Nuance software is a clear endorsement of our technology, and a testament to Cisco's dedication to providing leading-edge technology to its customers," says Nuance president and CEO Ron Croen. "Together, we'll help usher in the Voice Web generation."
